He should next examine the preparations referred to under the head Hypertrophy, with the aid of Vol. I of the manuscript Catalogue, which is to be found at the commencement of the series of General Pathology. He will then study the references which follow. All the works so referred to are in the Pathological Department, or in the Library. He will pursue a similar course with the succeeding sections. After this survey of the General Pathology, he may examine the Special Pathology in the same manner. A detailed manuscript Catalogue of the General and of the Special Pathology, in sixteen volumes, is placed in the compartments to which the volumes respectively belong. The first numbers on the white labels upon the preparations refer to the MS. Catalogue in English. The second numbers refer to Schroeder Vander Kolk's Catalogue in Latin. Green labels are affixed to those preparations which specially illustrate points in General Pathology, but they are described in their place under the first number. In the department is a small collection of instruments of diagnosis. The beginner is recommended to learn the use of these, and if he have the opportunity, to use them practically. If he desire either of these he is to apply to the Regius Professor of Medicine. About the Publisher Forgotten Books...
