Brand New Book ***** Print on Demand *****.Excerpt from A Treatise on Surveying, Vol. 2: Comprising the Theory and the Practice This treatise on Higher Surveying forms Part II of Gillespie s Surveying. Land Surveying and Direct Leveling form Part I. In the preparation of this volume the writer is indebted for important contributions to several friends who are specialists in the subjects they have here discussed. The chapters on Geodesy, Field Astronomy, Trigonometric Leveling, and Precise Leveling were prepared by Assistant O.B. French, of the United States Coast and Geodetic Survey, and the methods of work given are those approved by the Geodetic Conference held in Washington in 1894. The chapter on Topography was prepared by Prof. F. H. Neff, of Case School of Applied Science; the chapter on Mining Surveying, by Mr. E. P. Dickey, Mining Engineer, Pittston, Pa.; and the chapter on City Surveying, by Mr. Horace Andrews, City Engineer of Albany, N. Y. The methods recommended for the adjustment of observations are those given by Prof. T.W. Wright, in his work on The Adjustments of Observations. In connection with all subjects here treated will be found quite full references to a more extended treatment of special topics, which could not be fully discussed within the limits of this volume, the purpose being to aid students in their researches along special lines.
