The categories presented are not considered to be all-inclusive, but do provide a wide range of model applications. Infiltration models can be divided into various categories, depending on the purpose of the model, boundary conditions, and the nature of subsurface systems. In this study, six categories were identified for which the models chosen could be associated. The categories were chosen for representativeness to site-specific conditions, which is discussed in the following. Table 1. Infiltration model classification.
